Android developer with experience building reliable, maintainable apps and experimenting with IoT prototypes. I specialize in end-to-end development, from clean user interfaces and API integration to architecture and practical security practices.

Skilled in Kotlin, Android Core, Jetpack Compose, and Kotlin Multiplatform, I enjoy exploring small-scale hardware/software projects and integrating IoT prototypes with mobile apps. Continuously learning and refining my craft, I focus on delivering functional, efficient solutions while exploring emerging technologies in mobile and IoT development.
